REC • MIXTAPES, THE OLD WAY

Make someone a mixtape.

Pick the songs that remind you of someone. Tapie turns them into a real-looking cassette, with a case, a cover, a handwritten note inside, and a little retro player. Then send it with one link.

01

Add your songs

Type a song name and tap **+ Add**, or paste a YouTube song or a whole playlist link. Reorder them and split them into Side A and Side B.

02

Make it yours

Tapie reads the mood of your songs and designs the tape for you. Then change anything: colours, cover photo, stickers, polaroids, and a note inside the case.

03

Send the link

Tap **Save & share**. Your friend opens the link, flips the case, reads your note and presses play on the tape, side A to side B.

Little tricks

- ✨ **Mood button**: see the mood Tapie found (like *moody · mellow · warm*). Tap 🎲 **Shuffle** for a new look in the same mood.
- **Steer the mood**: want it darker or more romantic? Pick a vibe and the design follows, still in your songs' colours.
- **Flip** the tape to decorate side B, or flip the case to write your note inside.
- **Drag** stickers to move them; drag the ↻ handle to resize and rotate.
- **Undo** appears after every restyle, in case you liked it better before.
- ☾ / 🎲 at the top switch to dark mode or a random colour theme, even on a tape someone sent you.

🖤 noir · 🌙 lo-fi · 🌹 romantic · 💔 heartbreak · ☁️ dreamy · 🪩 party · ⚡ rock · 🎤 hip-hop · 📻 retro

Good to know

Do I need an account?
No. When you save, you get a **share link** for your friend and a **secret edit link** for you. Keep the edit link safe: anyone who has it can change the tape.

Can I change it later?
Yes. Open your edit link, or find it under **Your tapes** on the Tapie home page (same browser).

Where does the music come from?
Songs play from YouTube. A few videos don't allow playing outside YouTube; Tapie skips those automatically.

On a phone and it won't start?
Some phones need one tap on the little video. Tapie shows it for you when needed.

Made with love (and a little tape hiss).
